

Six Sigma and Lean

a Powerful Improvement Strategy

Tunnell Consulting offers a powerful approach to overall business excellence that delivers a decisive improvement strategy. We balance the breakthrough methodologies of Six Sigma with the waste-reduction tools of Lean Manufacturing to create a structured deployment that gives you the best of both: Productivity, Efficiency, Cost Reduction and Customer Focus. Six Sigma reduces variation, controls processes, unveils the root causes of problems, and yields quantum quality leaps. Lean unclogs bottlenecks, slices non-value added activities, speeds cycle time, and trims fat. Together, they support an organization fit for superior competitive advantage and top financial health.

What Balance Works For You?

Tunnell Consulting – with Six Sigma Author/Expert Dr. Ron Snee on staff – delivers the customized Six Sigma and Lean balance you need to boost process effectiveness, cut waste, and reap benefits

Tunnell's strategy builds on more than 40 years' experience in process and organizational improvement
